The Body in Religion: Cross-Cultural Perspectives

The scope of individual thinking and decision and the range of possibilities before the child are progressively narrowed; he is stripped of his innocence and openness of perception, his imagination, his dreams, his personal uniqueness, his spontaneity of feeling and action. Experimentation with new technologies in production lead to further discoveries and laid the ground for scientific advances that was in turn translated into other new technologies Mokyr, Two properties of knowledge that are essential for contemporary growth theory are non-rivalry and

partial excludability Jones, Partial economic excludability means that it is possible to exclude others from some of the economic benefits of knowledge e.
