Decoding Potential: The Science of Achievement --- Pathways to Understanding

The problem is quite simply this: if God is One and the Same, Self-Identical, and above all, immortal -or rather beyond Life and Death- then mortality, which characterizes all living beings qua living, and finitude, which characterizes all beings qua singular, whether animate or inanimate, has to be explained in a way that does not call into question the unity, unicity and self-identity of their divine origin. Tract tracing studies have revealed that amygdala nuclei have extensive intranuclear and internuclear connectivity. These studies indicate that sensory information enters the amygdala through the basolateral nuclei, is processed locally, and then follows a predominantly lateral to medial progression to the centromedial nuclei which act as an output station. However, little is known about the synaptic physiology of these circuits in the amygdala and how these networks integrate incoming information.
